DETAILED ACTION

Allowable Subject Matter

Claims 1-21 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art taken alone or in combination fails to anticipate or fairly suggest the limitations of the claims, in such a manner that a rejection under 35 USC 102 or 103 would be proper. The prior art fails to teach a combination of all the claimed features as presented in independent claim 1.

Specifically regarding claim 1, Tonar et al. (5888431) teaches the state of the art of a method for producing an electrochromic device.

But, Tonar et al. fails to explicitly teach a combination of all the claimed features including a method for producing an electrochromic device including the steps of preparing the initial electrochromic composition in the form of an electrochromic disperse system comprising a suspension and/or a colloid, and a disperse phase of said of disperse system comprises finely dispersed polymer particles with a size of 6×10^{-5} m and less, and deaerating the initial electrochromic composition to eliminate the dissolved oxygen and air introduced together with the finely dispersed polymer particles, as claimed.

As allowable subject matter has been indicated, applicant's reply must either comply with all formal requirements or specifically traverse each requirement not complied with. See 37 CFR 1.111(b) and MPEP § 707.07(a).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
